PROFILE

Passionate developer with a strong focus on building functional, user-centered applications. I am a learner who thrives on picking up new technologies and applying them to solve practical problems efficiently. I enjoy the process of continuous learning and am eager to contribute a disciplined work ethic and a fresh perspective to a professional development team

SKILLS

- Programming: Java, Python, JavaScript (ES6+), HTML5, CSS3
- Backend & APIs: Spring Boot, Node.js, RESTful APIs, CRUD
- Operations Frontend: React JS.
- Databases: MySQL, MongoDB
- Tools&Platforms: Docker, Postman, Git, GitHub, VS Code

EDUCATION

Bachelor of Technology in Information Technology (Pursuing) **2023 - 2027**
SSM Institute of Engineering and Technology,Dindigul, Tamil Nadu.

EXPERIENCE

CodeValue Technologies Pvt Ltd **AUG 2026 - SEP 2026**
Custom Development Intern

Completed a Custom Development Internship, gaining hands-on experience in HTML, CSS, JavaScript, and React.js. Developed responsive user interfaces and learned web application development and component-based architecture, then observed industry-standard coding and real-world software development workflows. Strengthened technical problem-solving, frontend development, and application design skills.

Infosys springboard Internship 6.0 **FEB 2026 - MAR 2026**
Java Full Stack Intern

Developed a VolunteerManagement System using Spring Boot, focusing on creating efficient backend logic and database connectivity.Gained practical experience in building RESTful APIs and managing data flow to ensure a smooth user experience.Strengthened technical problem-solving skills by implementing the coding. I implemented a Microservices architecture integrating a notification-service and event-service to handle automated outreach and real-time scheduling updates.

PROJECT

Volunteer Management System (Microservices)
Developed a volunteer management system to Ensure and create a volunteer profile and Admin profile using Java and Spring Boot microservices and connected with mongodb database with predefined Framework.Only admin can create event and alter then the volunteer can only Enroll and unenroll the event. This is developed in the Infosys Springborad Intership for my evaluation process.

Med Track Web Application
Developed a MedTrack web application designed to simplify healthcare scheduling by automating appointment bookings and doctor availability management. The system utilizes structured templates to display free appointment slots, allowing patients to easily view and reserve time in real-time. By focusing it providesa streamlined experience forbothhealthcareproviders andpatients.
